

# HARD IS NUTS

**YOU'D HAVE TO BE CRACKED  
TO BELIEVE AN ACOUSTICAL PLASTER  
CEILING IS BETTER BECAUSE IT'S HARDER!**

**The Fellert Acoustical Plaster is flexible, providing superior acoustic response, crack resistance and easier maintenance.**

Choosing the wrong acoustical plaster is just plain nutty! Fellert Acoustical Plaster provides the ideal balance of reflection, absorption and reverberation to maximize acoustic response in environments where sound fidelity just has to be right. Independent testing proves the Fellert system beats the harder and more rigid competition—hands down.

**And the benefits of flexible over rigid and hard don't stop with acoustics.** Building settling over time is inevitable: It only makes

sense that with the Fellert Acoustical System's superior flexibility it will resist cracks much better than a less resilient surface. And because even when you specify the best materials, wall or ceiling damage can happen, we engineered the Fellert Acoustical System to be unrivaled when it comes to patching and ease of maintenance.

**Better acoustics, less cracking, easier to maintain. You'd have to be nuts to specify anything less than Fellert!**

**Flexible, but TOUGH!**

We put ourselves to the test!
